## From Dating Site to Full-Scale Social Network

Client: Chris · Market: United Kingdom · Platform: Web Application

■ Custom Development Model

INITIAL QUOTE

£20,000

FINAL PROJECT VALUE

£400,000+

ONGOING RETAINER

£8,000 / mo

DEDICATED DEVELOPERS

2 × Full-Time

PROJECT TYPE

Social Platform

### ■ THE CHALLENGE

The client initially approached us with a straightforward brief — build a **dating website** using custom PHP, with a budget of £20,000. As development progressed, scope evolved significantly. The client began requesting additional social features, expanding the vision from a niche dating platform to a **full-scale social networking site** comparable to Facebook — complete with news feeds, user groups, real-time messaging, media sharing, and community-driven engagement tools. This required a critical technology pivot and complete re-evaluation of the project architecture.

### ■ OUR APPROACH & SOLUTION

To accommodate the expanding scope while maintaining code quality and long-term maintainability, we recommended migrating from custom PHP to the **Laravel framework** on the backend — providing robust MVC architecture, built-in authentication, and a rich ecosystem of packages. For the frontend, we transitioned to a **React.js + Angular hybrid** — React powering dynamic user-facing components and Angular handling the admin dashboard. The client accepted our proposal and we proceeded with a phased delivery model. Upon launch, we successfully upsold a **dedicated developer retainer** of 2 full-time developers at £4,000 each per month.

### ■■ TECHNOLOGY STACK

| LAYER              | TECHNOLOGY                  | PURPOSE / ROLE                                       | CATEGORY |

■ FEATURES & FUNCTIONALITIES DELIVERED

■ Smart Matchmaking Engine

Algorithm-driven compatibility matching based on preferences, interests, and location radius with swipe/like interaction.

■ Social News Feed

Real-time activity feed showing posts, likes, comments, shares, and events from connections — similar to Facebook’s core feed.

■ Real-Time Messaging

End-to-end encrypted private chat with typing indicators, read receipts, media sharing, and message reactions.

■ Rich User Profiles

Fully customisable profiles with cover photos, bio, interests, photo albums, timelines, and privacy settings.

■ Groups & Communities

Public and private groups with admin controls, member management, group posts, polls, and shared media galleries.

■ Notification Centre

Real-time in-app and push notifications for matches, messages, likes, comments, mentions, and friend requests.

■ Photo & Video Sharing

Multi-photo upload, video posts, stories (ephemeral content), and cloud-stored media with privacy controls.

■ Events Management

Create and discover local and virtual events, RSVP management, event reminders, and attendee interactions.

■ Advanced Search & Discovery

Elasticsearch-powered people, groups, and content discovery with location filtering, age range, and interest tags.

■ Content Moderation

AI-assisted flagging, admin moderation queue, user reporting, automated spam detection, and profile verification.

### ■ Admin Analytics Dashboard

Real-time platform metrics — user growth, engagement rates, content volume, revenue tracking, and geographic heatmaps.

### ■ Subscription & Monetisation

Tiered premium plans, in-app purchase credits, profile boosts, and Stripe-integrated billing with subscription management.

CareSoft — Special Needs & Group Home Management SaaS

Client: Joseph K. Mungai · Market: United States · Platform: Web SaaS

■ Managed Cloud Project · ■ Scope Sourced via Direct Channel

PROJECT QUOTE

\$8,000 USD

INDUSTRY

HealthTech / Social Care

PLATFORM MODEL

SaaS / Subscription

COMPLIANCE

HIPAA Compliant

PRICING MODEL

\$14.95 / User / Month

■ THE CHALLENGE

Joseph K. Mungai required a professional, **HIPAA-compliant SaaS web platform** to serve the mental health, group home, day program, senior care, and autism support industries across the USA. The platform needed to digitise and streamline the complex documentation, billing, treatment planning, and compliance reporting requirements of **Group Homes, Adult Residential Facilities (ARF), and Day Programs** — replacing fragmented paper-based systems with a unified, easy-to-use cloud solution. The product also needed to be commercially viable with a scalable subscription model, clean marketing website, and a free trial/demo pathway.

■ OUR APPROACH & SOLUTION

We delivered a **custom-built cloud SaaS platform** with a marketing-forward public website and a fully functional application backend. The public site — built on a **custom WordPress theme** — communicates the product's value with service pages, sample reports, demo scheduling, and testimonials. The core SaaS application was developed with a **PHP/MySQL backend**, supporting HIPAA-compliant data handling, encrypted storage, role-based access control, and a cloud-hosted multi-tenant architecture. Key integrations included **QuickBooks export**, automated medication reminders, state-required report generation, and an unlimited cloud storage layer — all accessible from any internet-connected device.

| Analytics           | Facebook Pixel · Google Analytics | Marketing conversion tracking, demo request funnels, user behaviour      | Marketing      |

■ FEATURES & FUNCTIONALITIES DELIVERED

■ HIPAA-Compliant Data Mgmt

Fully encrypted data storage and transmission, audit trails, and access logging meeting US federal HIPAA standards.

■ Progress Tracking & Graphing

Track individual progress notes, behavioural interventions, and goals — with visual graphs and trend reports.

■ Automated Service Billing

Auto-generate billing reports including activities, mileage, and hours per individual. Supports QuickBooks export.

■ Medication Reminders & Alerts

Automated notifications reminding staff of medications due for each individual, with administration logs and missed-dose flagging.

■ State-Required Report Gen

One-click generation of fully customisable, state-compliant reports printable or emailable directly from the platform.

■ Customisable Treatment Plans

Build and manage ISP, IPP, ITP, and IEP treatment plans tailored to each individual — instantly printable or email-ready.

### ■ Unlimited Cloud Document Storage

Upload and securely store all client and staff documents, files, and images in unlimited cloud storage — any device.

### ■ Multi-Device Cloud Access

Fully responsive — works seamlessly on phones, tablets, and computers. No app install needed; accessible from any internet browser.

### ■ Multi-Programme Support

Purpose-built workflows for Group Homes, Day Programs, Autism care, TBI (Traumatic Brain Injury), and Senior Living facilities.

### ■ Staff Verification & Accountability

Verify staff are entering data on time, correctly logging individual pickups, and accurately recording billable mileage.

### ■ Free Training & Onboarding

Integrated training portal with free training sessions for all staff and administrators via Calendly-powered scheduling.

### ■ Free Trial & SaaS Subscription

No setup fees, no hidden charges. Clients subscribe at \$14.95/user/month with a free trial and cancel-anytime flexibility.

## nomonday.mx — Fishing Tourism & eCommerce Platform

Client: Fidel · Market: Mexico & LATAM · Platform: WooCommerce

■ Product Engineering Framework · ■ Strategic Acquisition Model

INDUSTRY

Fishing Tourism

PLATFORM TYPE

eCommerce +  
Booking

MARKET REGION

Mexico & LATAM

LANGUAGES

English + Spanish

TRIP RANGE

\$220 – \$1,512 USD

### ■ THE CHALLENGE

Fidel, founder of **nomonday.mx**, required a professional bilingual eCommerce and experience booking platform to market and sell **premium fishing day trips across Mexico and LATAM** — spanning fly fishing, bass fishing, and offshore expeditions at destinations including Cancún, Xcalak, Campeche, Mazatlán, Lake El Salto, Lake Chapala, and more. The platform needed to handle complex booking logic (partial deposits, cancellation policies), multiple trip categories, branded merchandise, gift cards, raffles, and seamless customer communication — all while building an SEO-optimised online presence in two languages. The client was identified and onboarded entirely through **proactive outreach pipeline management**.

### ■ OUR APPROACH & SOLUTION

We built a fully featured **WooCommerce-powered store** on WordPress with a custom Elementor-designed theme that reflects the brand's adventurous, outdoors identity. The platform supports **multiple product types** — bookable day trips with per-day pricing, branded merchandise caps, digital gift cards (\$250–\$1,512 USD), and raffle products — all under one roof. We integrated **Stripe and PayPal** for secure checkout, a 50% deposit booking model with free cancellation terms, and a **WhatsApp Business** channel for real-time customer support. A bilingual (EN/ES) architecture was implemented to serve both international tourists and the Mexican domestic market. Email marketing, Facebook Pixel, countdown promotional banners, and a wishlist system completed a full go-to-market toolkit.

## ■ FEATURES & FUNCTIONALITIES DELIVERED

### ■ Multi-Category Fishing Catalog

Organised catalog with Fly Fishing, Bass Day Trips, and Offshore categories — 15+ destinations from \$220 to \$1,512 USD/day.

### ■ Online Booking + Deposit System

Book trips with just 50% upfront. Automated confirmation, cancellation management with 5-day free cancellation policy.

### ■ Bilingual Store (EN / ES)

Full English and Spanish version with seamless language switcher — targeting international tourists and Mexican domestic market.

### ■ Multi-Gateway Secure Checkout

Stripe and PayPal integrations supporting credit card, bank transfer, and PayPal checkout with USD pricing and tax handling.

#### ■ Digital Gift Card System

Purchasable digital gift cards (\$250–\$1,512 USD) for fishing trips — ideal for gifting experiences and new customer acquisition.

#### ■ Branded Merchandise Store

Limited-edition cap drops with individual product pages — 'Caps Drops' collection featuring Lake-branded designs at \$69.99 each.

#### ■ Email Capture & Discount Funnels

Pop-up email capture offering 5% off first order via Monster Campaigns, plus a fishing season newsletter list for repeat bookings.

#### ♥■ Wishlist & Trip Comparison

Logged-in users can save fishing trips to a shareable wishlist — useful for group planning and repeat visit engagement.

#### ■ Raffle & Contest Platform

Built-in raffle product category for day trips, gear, and branded merchandise — driving engagement, email sign-ups, and repeat visits.

#### ■ WhatsApp Business Integration

Floating WhatsApp button for instant customer support, trip inquiries, and booking assistance — connecting to the team in real time.

#### ■ Seasonal Promotions & Timers

Live countdown banners for time-sensitive deals (e.g. 10% off Mazatlán offshore), driving urgency and on-season booking conversions.

#### ■ Blog & Fishing Content Hub

Integrated fishing blog for SEO content marketing — travel guides, fishing tips, location spotlights driving organic search traffic.
